Selective Bindery Control & Mailing System

With over 30 years of experience, ECS offers complete intelligent bindery control systems for selective pocket feeding, intelligent inkjet addressing, and camera verification on catalogs, magazines, and publications. ECS solutions work with all major bindery line manufacturers and all systems are scalable as your business grows.

General System Configuration

- Microsoft solution includes MSSQL database backend, Windows 7 frontend and RTX realtime
- File-server database driven with network connectivity between one or more systems
- Accessible by remote work stations for off-line make-ready and reporting
- Can save multiple set-up configuration and job files for quick make-readies
- High-integrity tracking and production monitoring for 100% accurate selective inkjet production for maximum postal savings and customer satisfaction

ECS 9700 & ECS 9200 CONTROLLERS

■ ECS 9700: Full-featured in-line selective pocket, multi-station inkjet control system

- Up to 100 selective feeders
- Up to 16 print stations (inside/outside/pocket/mailtable/raceway)
- Full stacker control with automatic reorders
- All types of finishing lines, polywrappers and comail lines
- File server/networked system

■ ECS 9200: In-line basic inkjet and stacker control system w/limited selective pocket control

- Up to 6 selective feeders
- One or two print stations
- Full stacker control with automatic reorders
- All types of finishing lines, polywrappers and mailtables
- Stand-alone or file server/networked system
- Upgradeable to ECS 9700 System

■ Selective Pocket Feeding Control

- Automatic reorder control
- QC at every pocket, gathering chain and mailable
- Camera system integration for selective binding of pre-personalized sigs; read and print; read-verify

■ Multi-station In-line Inkjet Imaging and Mailing Systems

- Signature read and print
 - Up to 16 print stations within a line
- Optional Kodak, VideoJet and Domino inkjet support
- ECS offers three lines of inkjet solutions
 - 600 — 600dpi 4 ¼" print width
 - P400 UV — 400dpi 2 ½" print width
 - T600 — 600dpi 2" print width
- Intelligent stacker control
 - Rima
 - Muller
 - Goss

■ Camera Verification Systems

- Pocket signature verification system
- IMB barcode and print verification

■ Compatibility

ECS Controllers work with all major bindery line systems including:

- Muller Martini
- Heidelberg
- Goss
