SV1000™ Signature Verification Camera System

Signature verification camera system

SV1000™ Signature Verification Camera System

The ECS SV1000™ camera verification system is designed to increase integrity and productivity in many bindery processes.

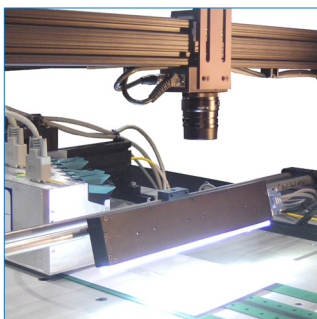

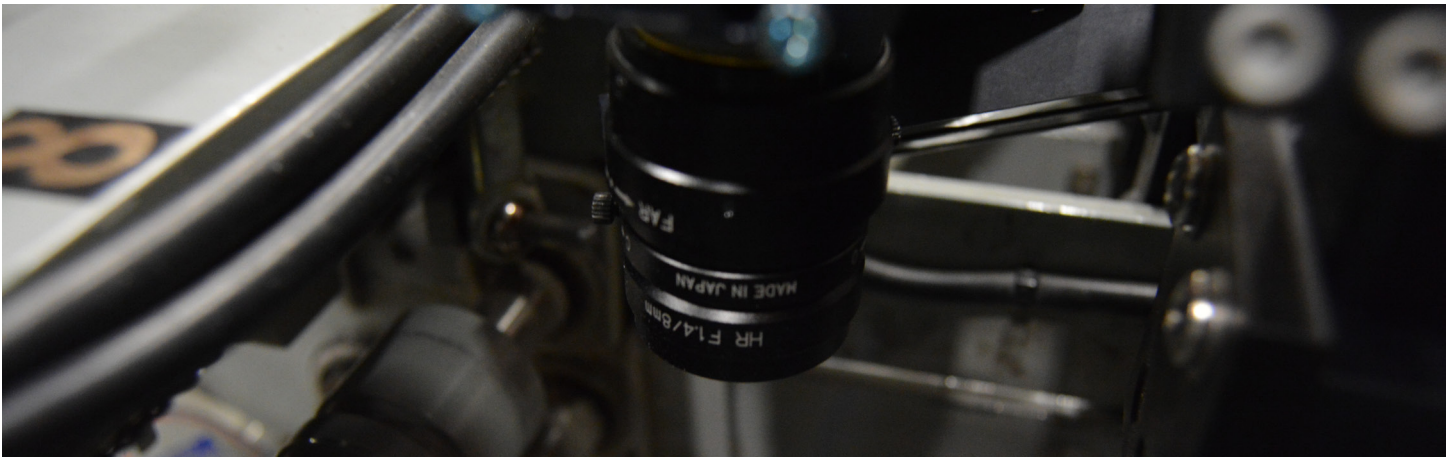

ECS manufactures all the components of the system including cameras, tracking controllers, software and inkjet printers offering one truly integrated solution.

Your bindery lines require more integrity than ever before. You need a system to match.

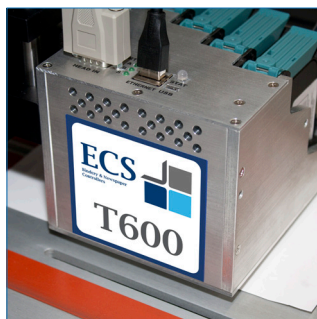

In today's competitive market, pocket verification and read-and-print jobs have become a standard service offered by hundreds of bindery shops.

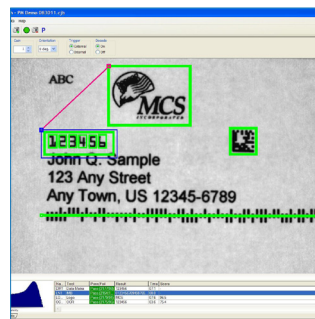

Add value to your mail process by increasing integrity and productivity.

Optional Line-Scan Camera

Optional ECS T600

Process multiple areas of interest

Multiple camera options

The ECS SV1000™ System

- Matching System – Up to 12 cameras
- Read and Print – Supports all ECS inkjets
